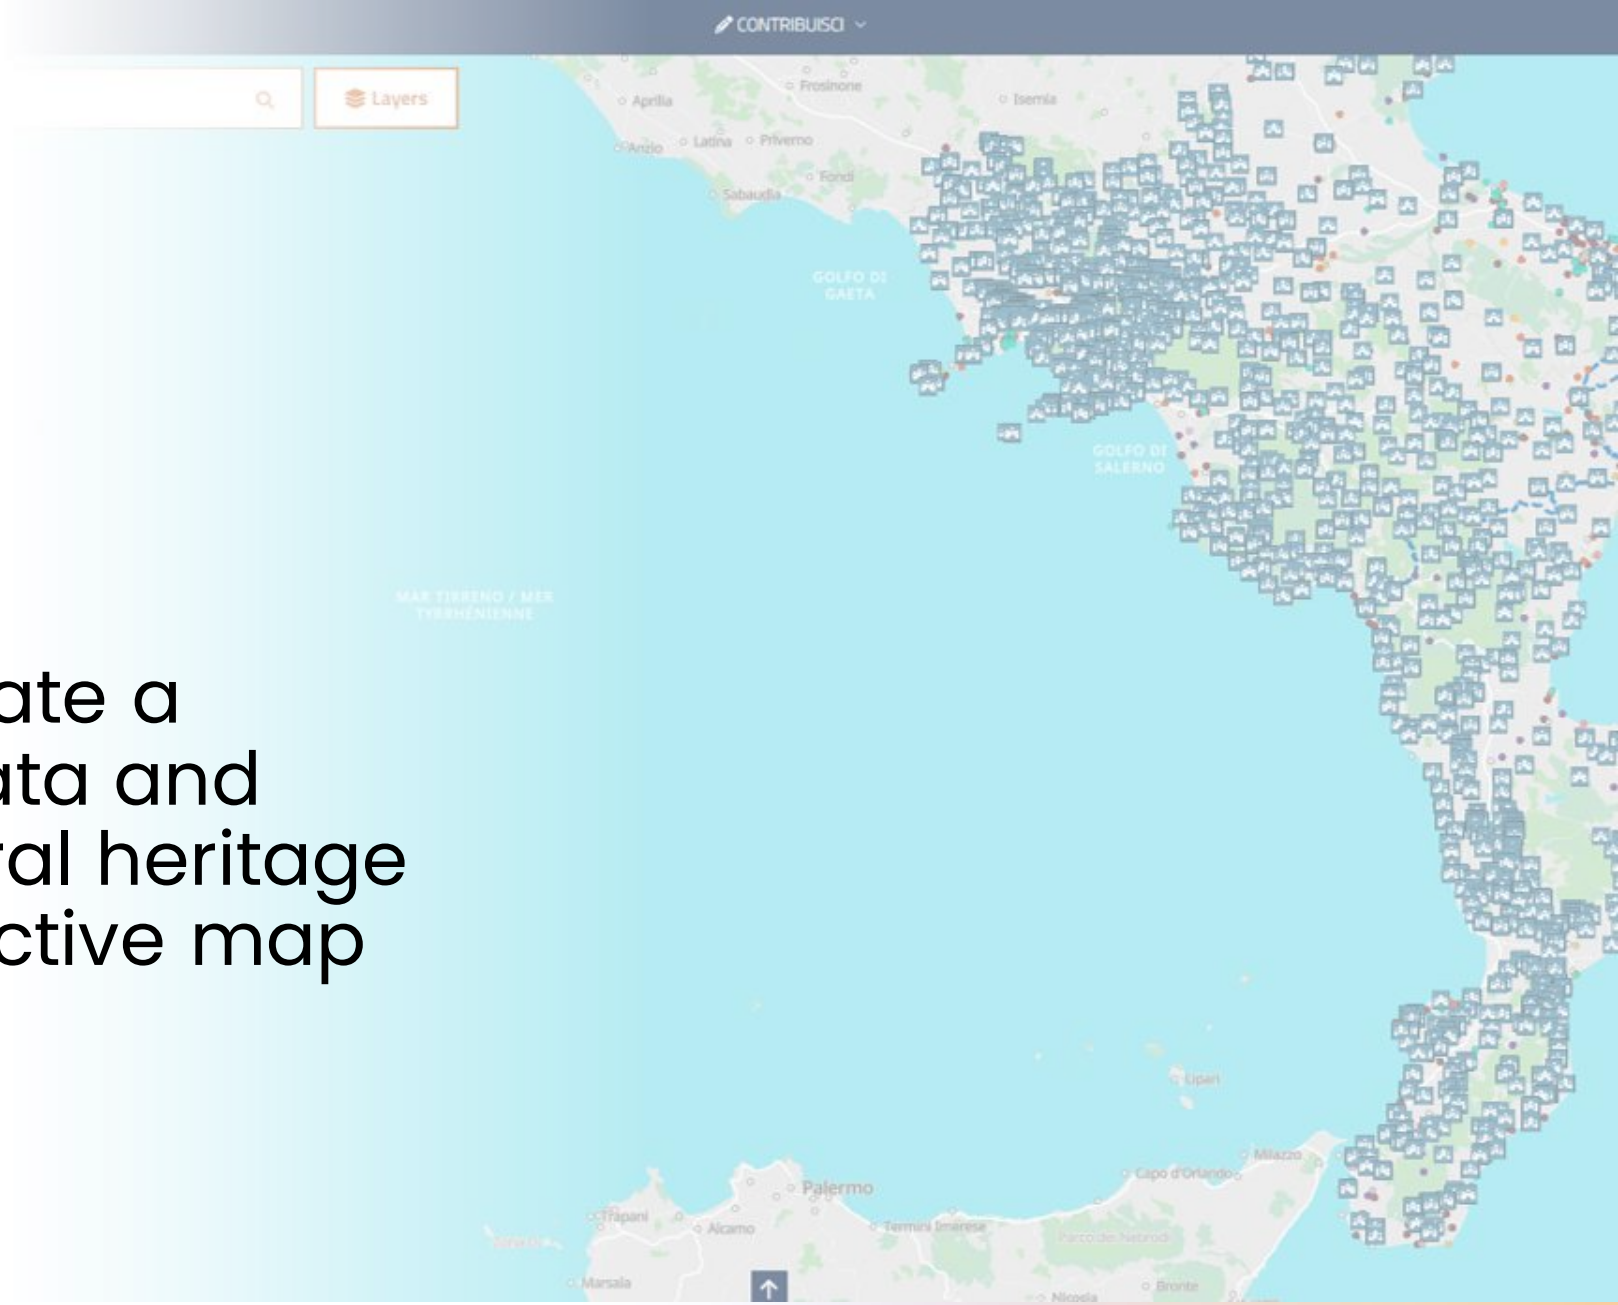
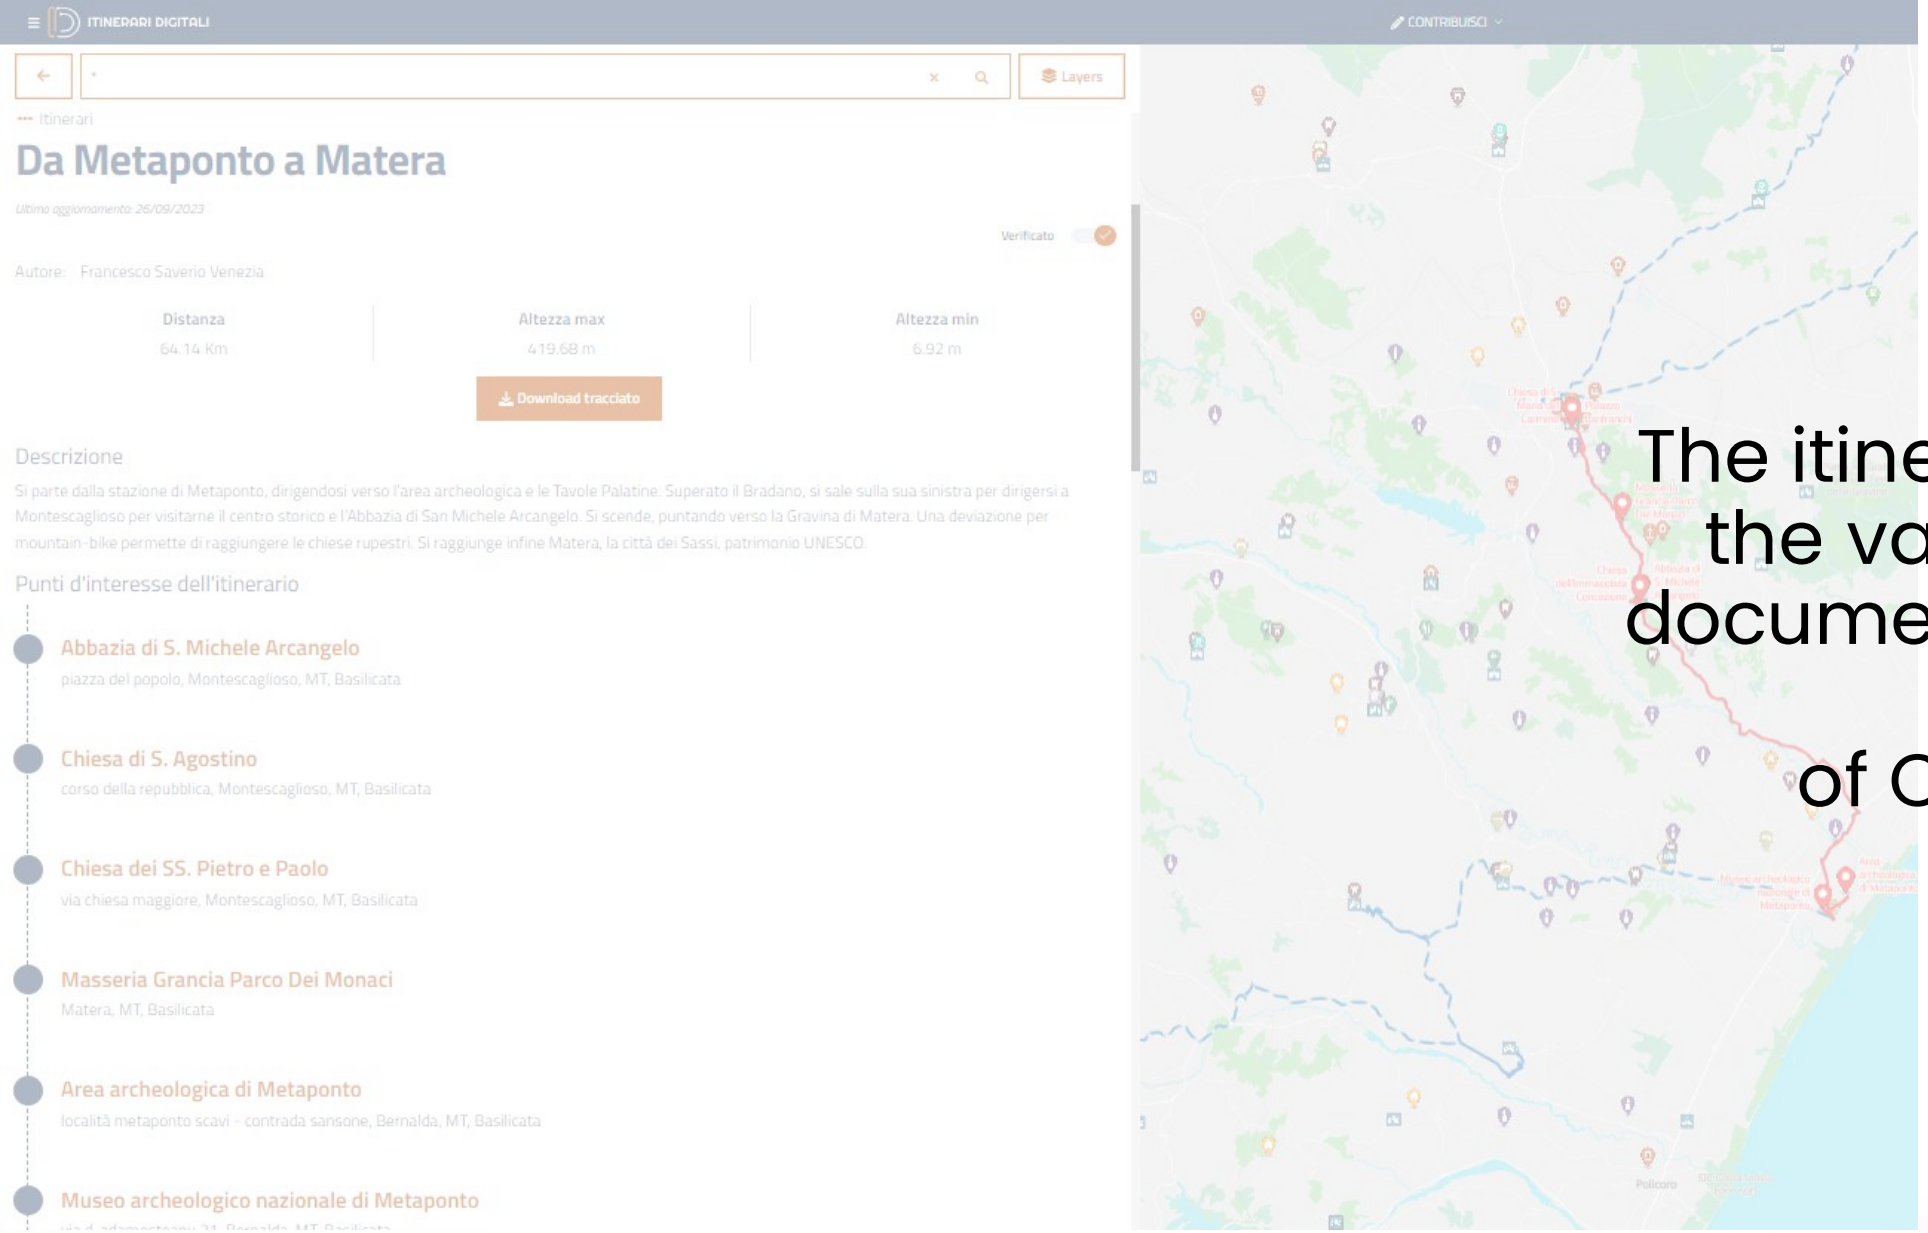
ITINERARI DIGITALI

The Platform

The ICCD aimed to create a consultation tool for data and resources about Cultural heritage starting from an interactive map



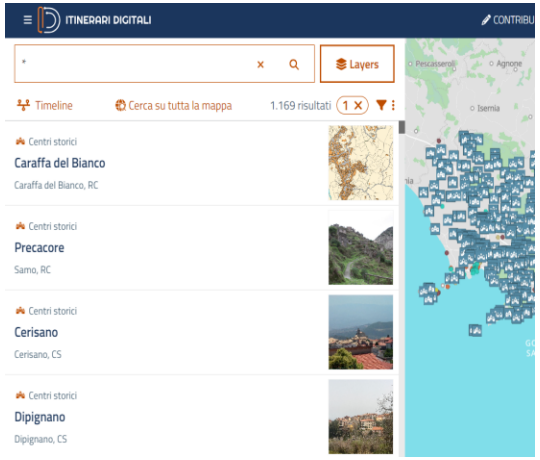
Valorization



The itineraries enhance the value of data and documentation coming from Ministry of Culture dataset.

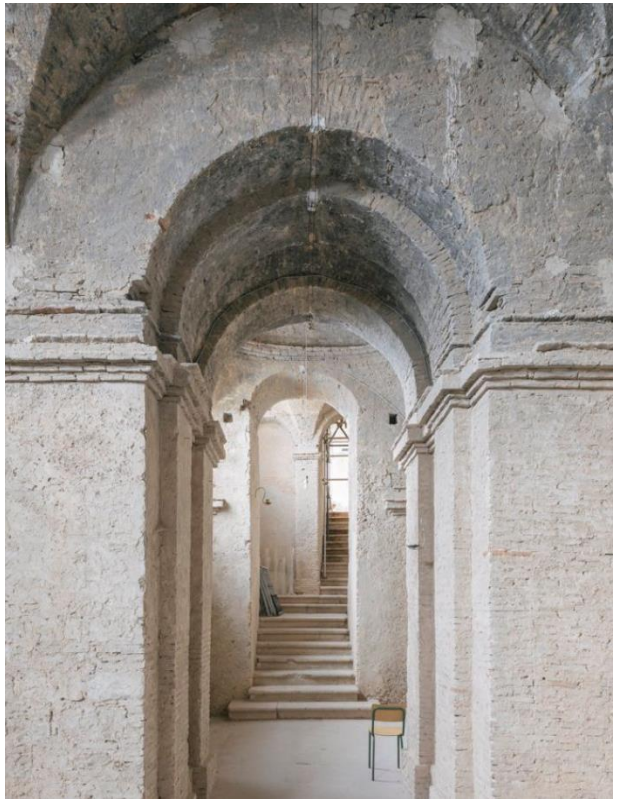
Valorization

Historic city centers

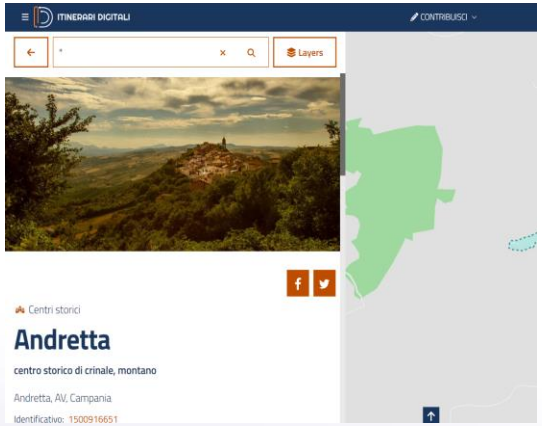


Historical cartography

Photographic documentation



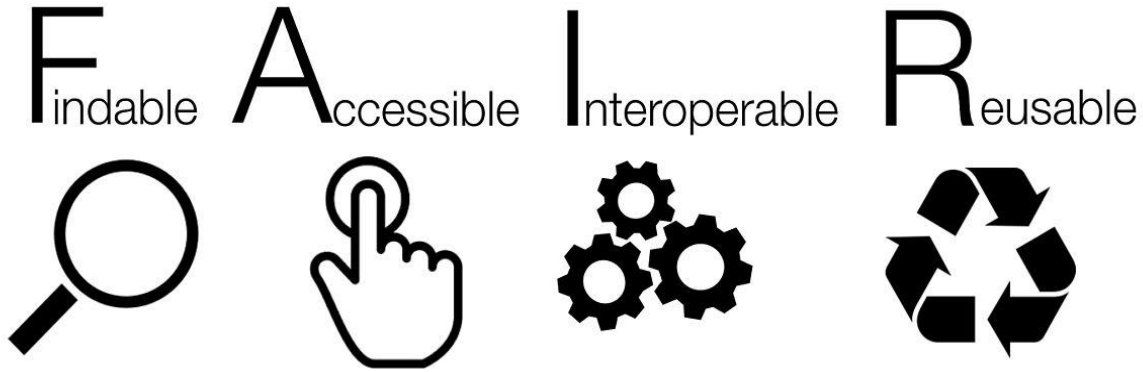
Simone Mizzotti, Concattedrale di Santa Maria Assunta, Matera



Intangible heritage

Enhancing Data

Our data are

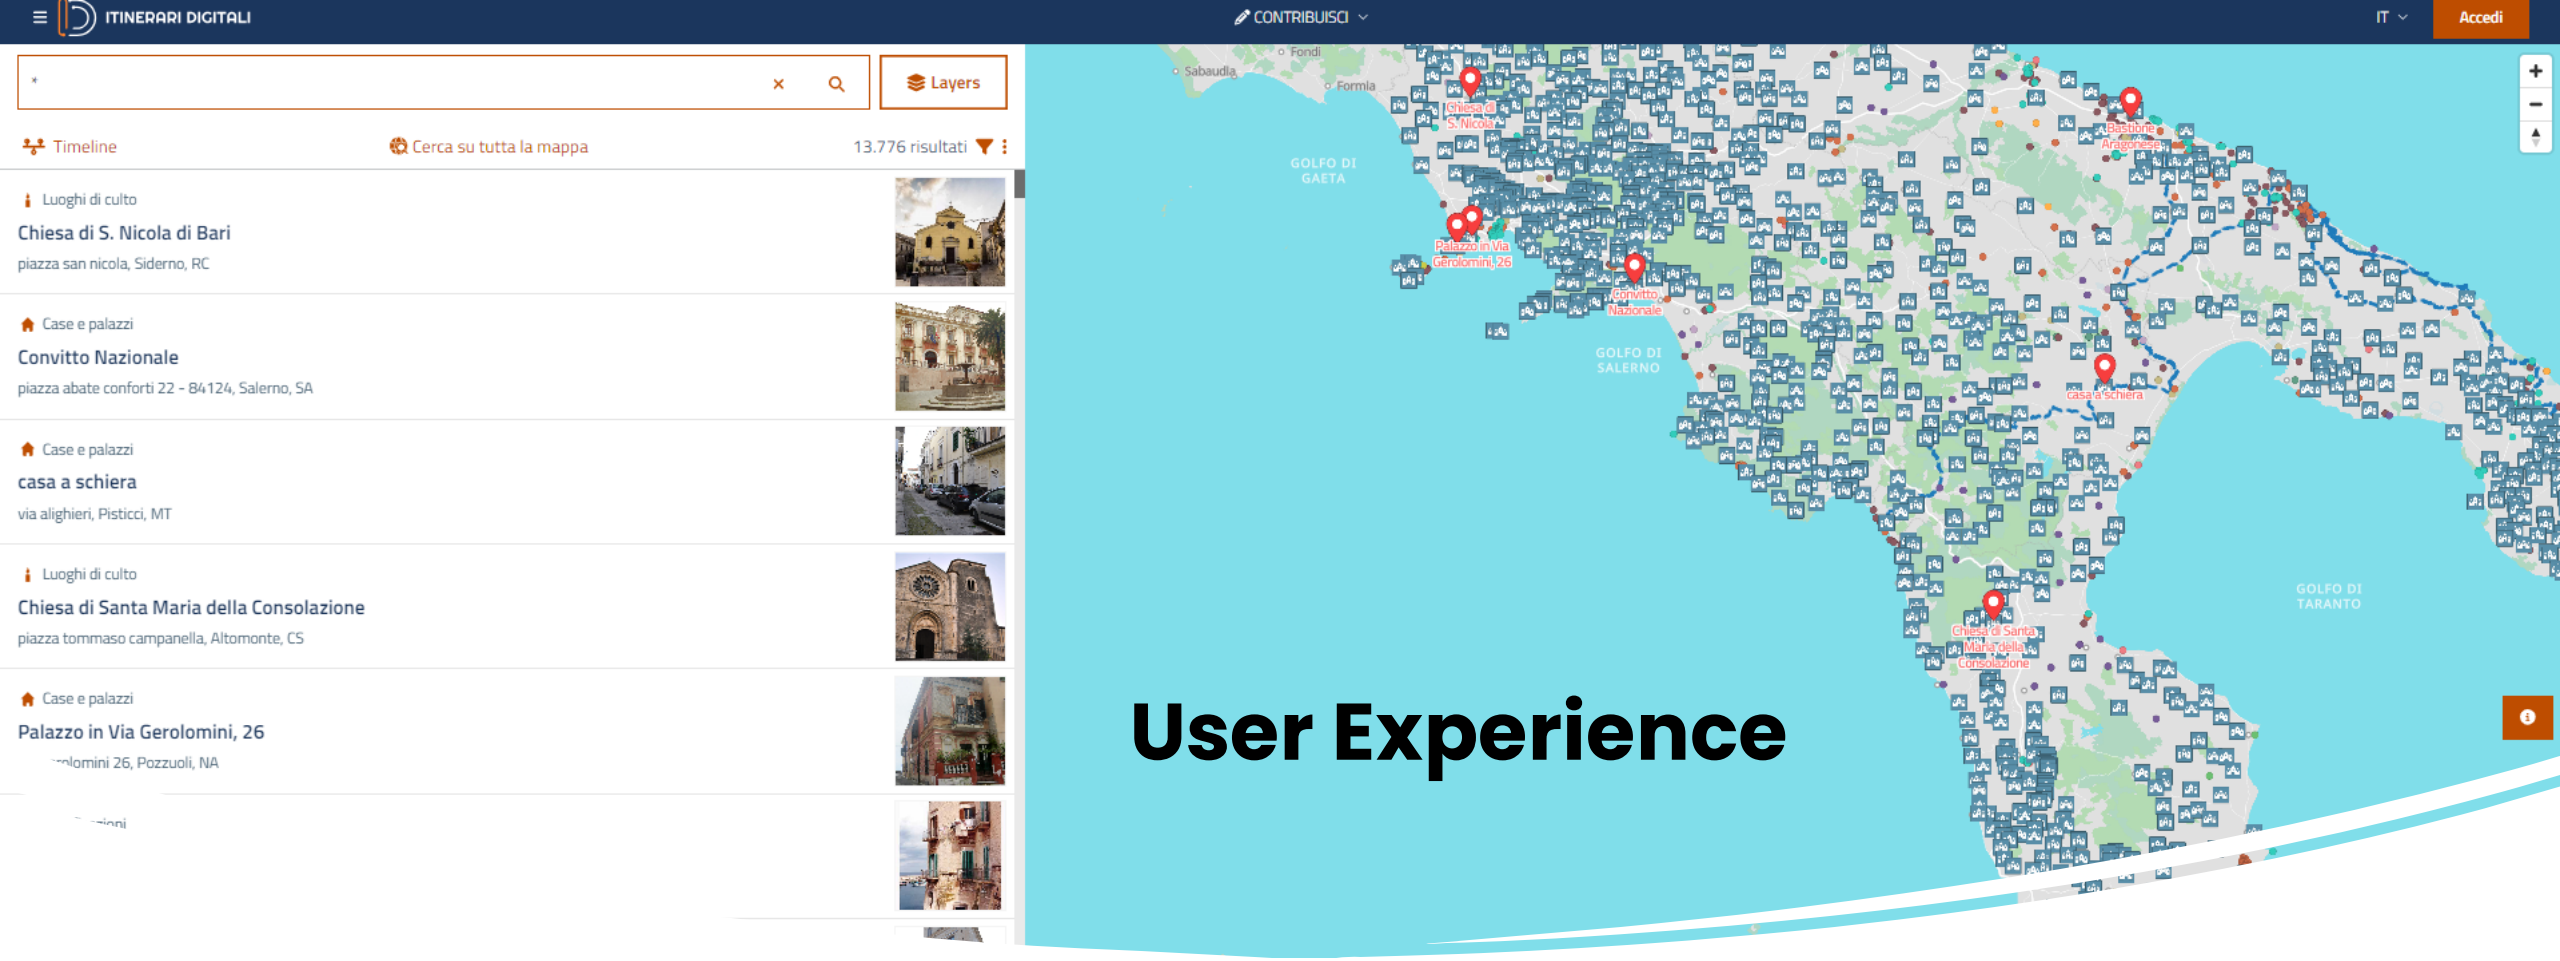


Enhancing Data

The original dataset allowed an easy extraction of data in GeoJSON format. The new database is the starting point for the actual portal.

Enhancing Data

Itinerari Digitali aims to inspire the development of new applications built on top of linked open data, eventually updating the knowledge graph, also with different goals.



The users are encouraged to explore the map! They can search, contribute and create new connections. Thanks to these interactions, the new platform can grow up.

How would you like to contribute to our project?

Future goals

Finally, the Institute's purpose is to carry on all the experimental work already done, integrating its tools in further development of the General Catalogue of Cultural Heritage.

Thank You for Your Attention!
